Introduction

Teckru can offer you the benefit of long, profound experience and know-how in equipment building for the food industry in general and the cocoa processing industry in particular.

Teckru's mission is providing the best quality and information to help you perform better.

When it concerns developing, manufacturing, overhauling, repairing and modifying various types of machinery: We feel we can do a better job. Thus giving you the most efficient equipment, enabling you to output your product with the desired quality.

Primary subjects:

- Cocoa butter presses and related equipment: cake conveyors, cake kibblers, hydraulic units, cocoa liquor preheaters/homogenizers, butter weighing systems and liquor pumps.
- Powder grinding and classifier systems.
- Tempering/cooling systems for kibbled cocoa cake, powder, liquor and butter.
- Cocoa butter filtration systems.
- Spare parts for the above mentioned systems.
- Installation, integration and renovation of complete cocoa processing lines, including transport systems.

Our aim is to support you in achieving:

- Constant good quality product
- More capacity
- Better Performance
- Lower maintenance cost
- Less downtime
- Longer lifetime

We are in a position to offer you this with know how and by using excellent high grade materials machined at the most modern machine centers.

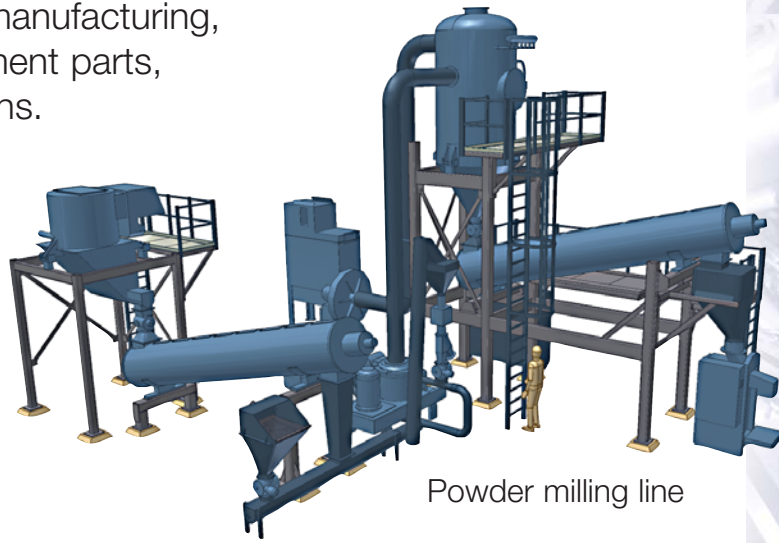

Various spare parts in stock

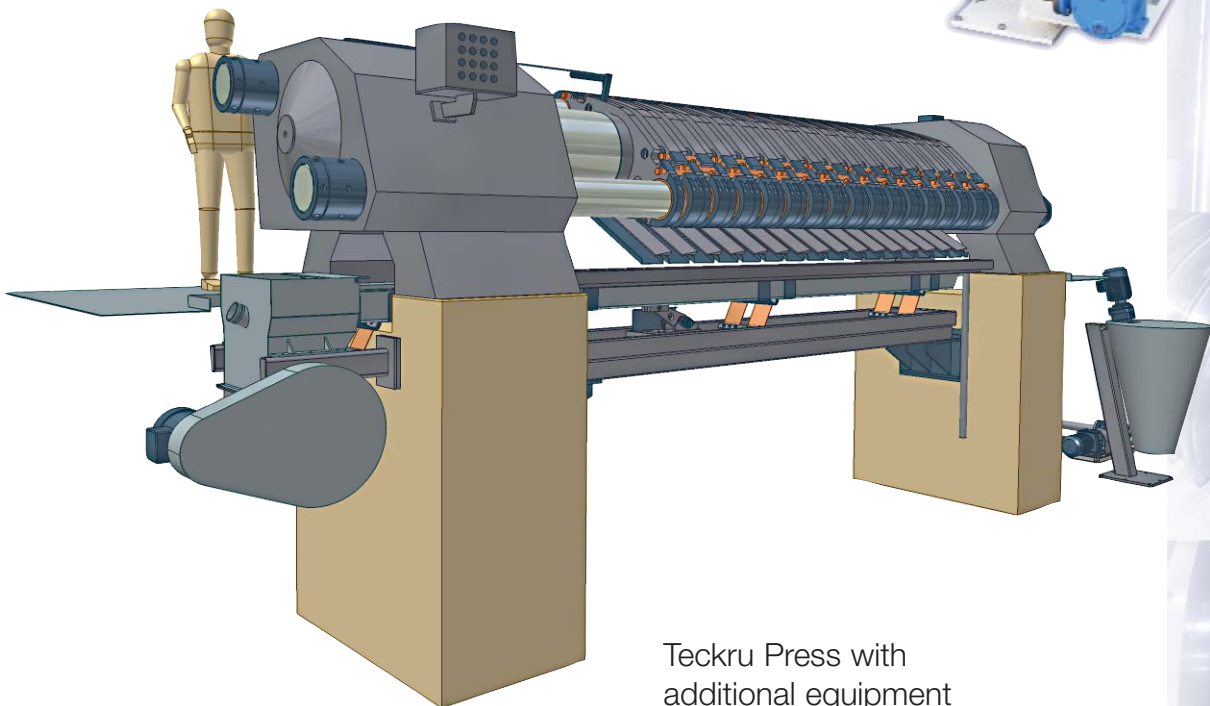

Product examples

Machine design and manufacturing,
upgrade and replacement parts,
or complete installations.

Below from L to R:
Hydraulic unit
Press pot+counterpot
Liquor preheating system

Powder milling line

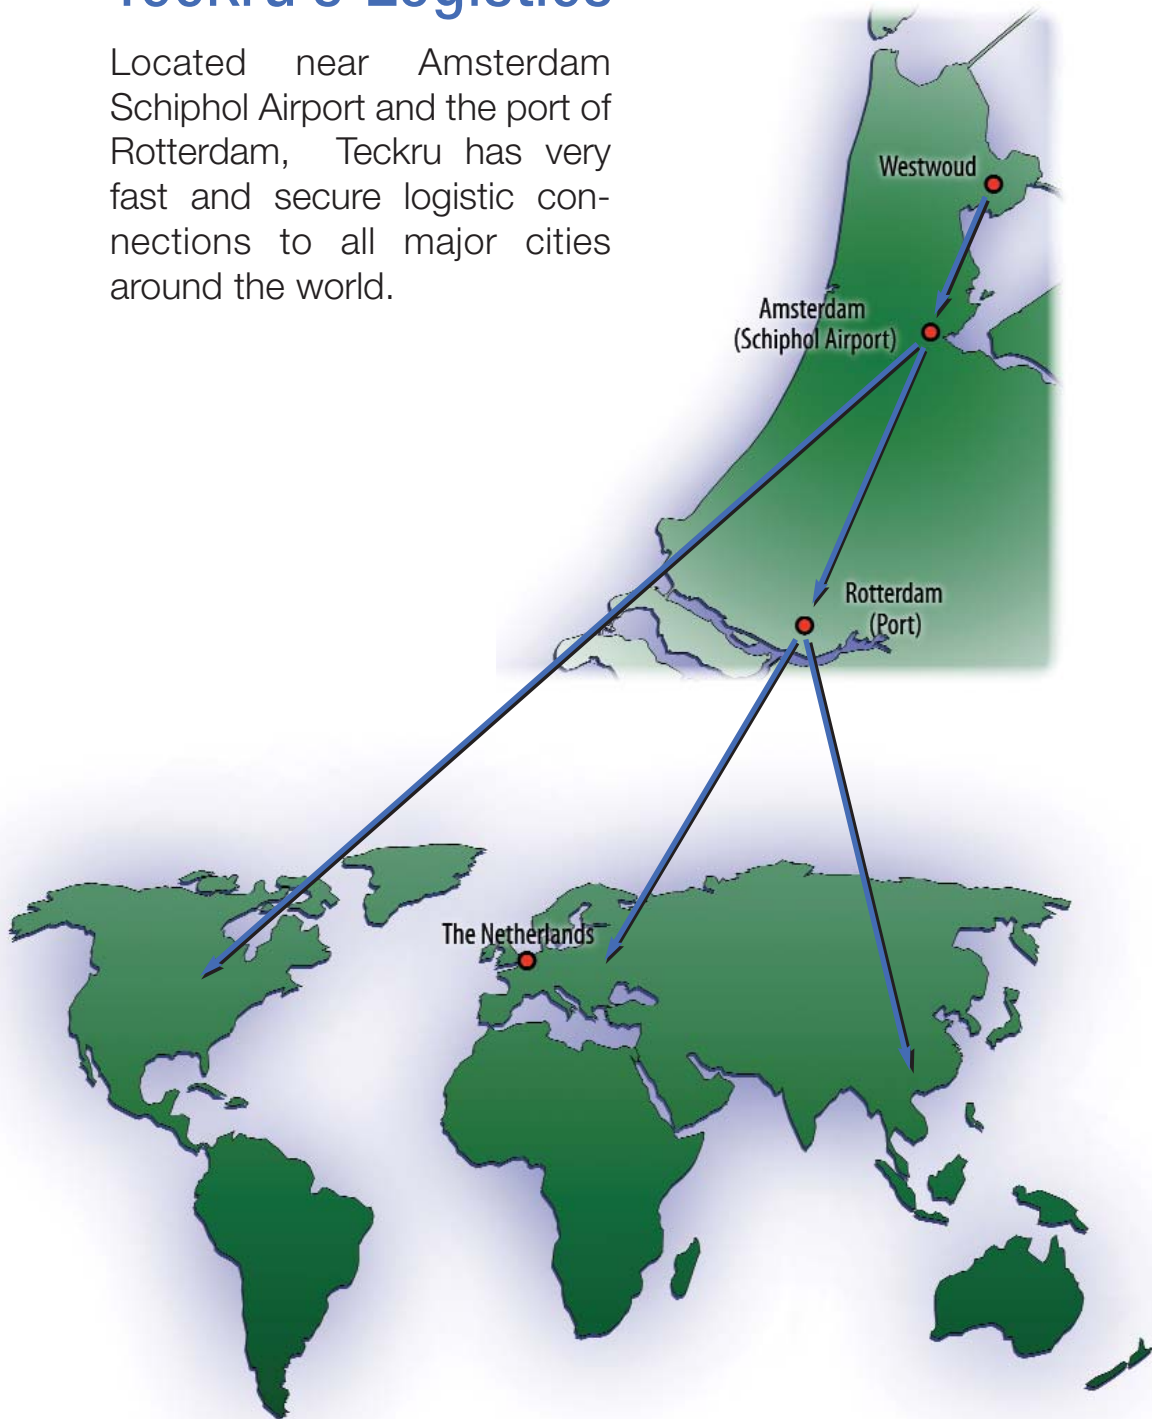

Teckru Press with
additional equipment

Teckru's Logistics

Located near Amsterdam Schiphol Airport and the port of Rotterdam, Teckru has very fast and secure logistic connections to all major cities around the world.
